

PRODUCT DESIGN AND ENGINEERING SERVICES (PDES) - Strategic Business Unit

Mysore, 3 March, 2008 – The Management has decided to form Product Design & Engineering Services (PDES) as a SBU. This decision was taken keeping, the performance of the Mechanical Department & Market Growth in mind.

The Mechanical Department was initially formed to aid the Electronic Product Design Team, over last two years; the Mechanical Department grew multifold in terms of people and Capabilities.

Over last three quarters, the Department is bidding and handling exclusive Mechanical Product Design, Engineering Services projects independently and successfully delivering to various customers.

The PDES will be headed by Mr. Shubha Chethan S, who was earlier heading the Mechanical Department. An alumnus of National Institute of Engineering, Mr. Shubha Chethan has worked earlier with Engineering Giant, Larsen & Toubro and WeP (formally known as Wipro E Peripherals). Mr. Shubha Chethan, in his presentation to the board proposed to initially target the Domestic Market.

ABOUT PDES, PDES has a team of qualified engineers, trained in specific domains, with an ability to work on, Product Design, Engineering Analysis, Reverse Engineering, Value Engineering and Optimization, Jigs and Fixture Design, Tool Development, Drafting, 3D Modeling and Legacy Conversion.

ABOUT IMPLANTAIRE TECHNOLOGIES (I) PRIVATE LIMITED - Implantaire, is an ISO 9001:2000 Electro-Mechanical design Services Company with offices in Texas, USA and Mysore in India.
